Presentation of FRCC Scholarship				●		
Sponsor of Innovation Center Display				●		

PEAK is a unique trade show event for those in the technology industry. Manufacturers, distributors, and innovators are all invited to display their business to potential customers and the community. This event stands out above others due to the Longmont Chamber's partnership with the Rocky Mountain Government Purchasing Agency, an organization that brings government entity representatives to participate in a Reverse Vendor Trade Show. Businesses seeking government contracts will be able to meet with these entities to learn more about the projects they are looking complete.
