

More about the Beneficiary organisations

Days for Girls: The kits supplied by Days for Girls enable the girls to stay on at school instead of missing classes for a week every month. The loss of education means the gaps of knowledge widen and they end up leaving school early. The funds will allow us to support a cottage industry by sourcing the kits within Nepal and then distributing them.

BRAVE Centre: The Centre supports young people with a disability, often as a result of the earthquakes, and helps them to find skills that will allow them to support themselves. As they develop their skills, they will mentor and support other young people so begging on the street is not the only option. The funds will assist the employment of teachers.

Bhawani Hostel: Because the Gorkha region is remote, there are many students who live many hours/days walk from the nearest school, particularly secondary school. The Bhawani Hostel allows more than 70 students to attend school. Unfortunately, the hostel was demolished in the earthquakes so the students are living in tents, even in the summer monsoon and below freezing temperatures in winter. The funds raised will go towards rebuilding the hostel.
